S.121 – Architects and Specifiers Information

Elite Crete Systems offers architects and specifiers with the ability to make exterior concrete finishes (repair or decorative) and custom seamless flooring (residential, commercial or industrial) a high performance and elegant element of your overall design. No matter what the style of building or surrounding, there is a design and color combination of our finishes that perfectly fit and enhance the visual appeal of your project.

As a piece of mind, consider the following points of our finishes and compare them to the products and finishes you might currently specify:

- Hundreds of color combinations to choose from, therefore finishes can be customized to fit with any designed scheme or other chosen construction materials.
    - 30 standard colors of HYDRA-STONE™ Dye Stain.
    - 36 standard colors of ULTRA-STONE™ Antiquing Stain.
    - 12 standard colors of CHEM-STONE™ Reactive Stain.
    - 20 standard colors of REFLECTOR™ Enhancer.
    - 15 standard colors of industrial epoxy coatings.
    - Virtually unlimited colors of flake broadcast epoxy flooring.
- Countless slate, granite, tile, cobble stone, sandstone, random stone, wood decking and various brick designs in many variations of shape, surface texture and pattern are available.
- Unmatched versatility. Whether your project is interior or exterior, commercial or residential, above or below grade we have a system and solution for your needs and requirements. From Thin Stamped Overlays to Chemical Stain Finishes to Epoxy Systems, our product and systems line covers all specifier needs.
- The secondary applications of highlighting stains are used to create an antique, natural look. Even new installations can be made to resemble older building materials and surfaces with ease.
- All of our finishes are low maintenance and permanently sealed to protect against oil, grease, dirt, high traffic and more.
- Functional and long lasting. 100% resistance to UV means colors do not fade and the slip resistant surface has been time tested and used by many State DOT's and larger commercial contractors on hundreds of different applications.
- Our finishes are extremely durable, freeze/thaw resistant and designed to perform long term.
- Our systems are economical since they provide long term, durable renovation without the need for costly and continuous repairs normally associated with deteriorated surfaces.
- The systems can be installed at any time during new or old renovation processes. This allows all other renovation aspects to be completed without fear of damaging or wearing the new surface.
- Elite Crete Systems have been specified by an extremely wide range of customers and amongst the better known are Marriott Hotels, Harley-Davidson Dealerships, McDonalds, Amoco Gas Stations, Shell Gas Stations, Concrete Ready Mix Companies, Municipalities and more all over the World.
- Easy to specify as we provide full specification documentation which includes technical data sheets on the component materials used to install the finishes, test data, references and step by step instructions.
