

Elite Crete Systems, LEED and Sustainability

LEED (Leadership in Energy and Environmental Design) is the most widely used green building rating system in the world. Available for virtually all building types, including new construction and restoration, LEED certification is a globally recognized symbol of sustainability achievement and leadership.

Elite Crete Systems is dedicated to not only offering eco-friendly engineered flooring systems that may assist property owners in earning LEED credits and certification, but also through sustainable practices in our manufacturing process. Our sustainable flooring systems are produced from castor oil based products and eco-friendly additives, while the drums and other packaging from our raw materials are recycled.

LEED Credit Availability

Environmental Quality

✓ EQ 4.2 – Low Emitting Materials

We offer engineered flooring systems that are VOC free and compliant with state and federal regulations.

Materials and Resources

✓ MR 1.1 and/or 1.2 – Building Reuse

Many of our products are specifically designed for restoration and repair of existing concrete flooring systems. Additionally, all of our products are suitable for installation on pre-existing concrete surfaces.

✓ MR 2.1 – Construction Waste Management

Products are offered in a variety of packaging and size options designed to reduce waste. Our pails and most of our packaging is recyclable.

✓ MR 5.1 and/or 5.2 – Regional Materials

May be applicable to projects that are located within 500 miles of the Elite Crete Systems manufacturing plant or aggregate sources.
