ENGINEERED HIGH PERFORMANCE SURFACES & FLOORING

Medical Cannabis Flooring Systems

are resinous finishes engineered for various applications in the medical cannabis industry. These applications include cosmetically appealing floors for retail medical dispensaries, ultra durable reflective surfaces and radiant heat barriers for indoor cultivation areas, and laboratory-clean flooring for processing and extraction facilities as well as testing labs.

Due to the unique and unrepeatable nature of these flooring systems, consult with a technical representative before installing or specifying.

TYPICAL AREAS OF USE

- Retail stores
- Indoor cultivation areas
- Processing and packaging areas
- Testing laboratories
- Extraction facilities

ADVANTAGES

- Ease of maintenance
- Protects the concrete substrate
- Aesthetic improvements
- Hard and abrasion resistant
- VOC free - CA 01350 air quality compliant
- Stain and chemical resistant
- Antimicrobial
- Satin or gloss finish
- Wide selection of colors, patterns, and other options
- Custom logos available
